VACANCIES: PYTHON PROGRAMMERS WHO'D LIKE TO CHANGE THE WORLD

Want to work for an organisation building cutting edge Django, Python and GTK applications? Feel like changing the world while you do it? Want to get paid to work on FOSS technologies?

Translate has a long record of working in FOSS and addressing language needs in South Africa and Africa. Taking our African experience we're now providing solutions to companies across the globe.

To address our growing needs we're recruiting Python programmers. You will join our expanding and experienced team who are developing our leading FOSS translation and localisation tools as well as other language related technologies.

We are looking for qualified programmers interested in language related technology:

Required Skills/Experience:

- FOSS
- Python
- Version control systems

Added Advantage:

- Language/Translation experience
- Django, GTK development experience

Salary negotiable commensurate with experience and skill.

Interested Candidates can apply by sending:

1. Your CV,
2. Transcripts of your academic results, and
3. In your covering letter please supply: Details of programming projects that you have been involved in and your role in these projects. Preferably supply or point to the code that you have written. Your salary expectation

by email to fax@translate.org.za or

by fax to 086 599 2949.
